AI Ethics & Responsible Usage Declaration

I hereby declare that:

- The dataset used in this assignment is properly cited and ethically sourced.
- I have analyzed potential biases present in the dataset and model.
- I have considered privacy implications related to the data used.
- I understand the responsible and ethical usage of the developed system/model.
- This work adheres to institutional guidelines on ethical AI practices.

Dataset Details:

Source: National Stock Exchange of India (NSE)

Type of Data: Historical financial time series data (Daily equity stock prices, trading volumes, and historical highs/lows for DLF Limited).

Contains Personal/Sensitive Data? (Yes/No): No

If Yes, describe anonymization steps: N/A

Identified Bias (if any):

Market-Hours Bias: The data only reflects price movements during official NSE trading hours and does not account for after-hours trading or global market impacts that occur when the Indian markets are closed.

Historical Bias: The dataset only captures past market behavior and assumes future trends will follow past patterns, completely ignoring external real-world factors like company news, geopolitical events, or sudden macroeconomic shifts.

Responsible Usage Statement:

This dataset and the accompanying forecasting models are intended strictly for educational, analytical, and demonstration purposes. The ARIMA model predictions are based solely on mathematical patterns in historical data and do not reflect the true unpredictability of financial markets. The results should not be construed as financial advice, investment recommendations, or a reliable indicator of future stock performance. Users should consult certified financial advisors before making any real-world trading decisions.

Student Details:

Student Name: Ayush Ramesh Sawant

UIN: 231A009

Course: AI&DS

Date: 17 MARCH , 2026

Signature: _____
